Flutter App Development Tasks & Instructions — Apexcify Technologys

---

Flutter App Development — Internship Overview

This internship program provides real-world experience in **mobile and web application development**. ApexcifyTechnologys is a leading software development company committed to fostering innovation and excellence in technology. The internship equips students with hands-on experience in building user-friendly, scalable apps using modern frameworks and tools. Interns will gain practical knowledge, receive expert mentorship and work in a collaborative, project-based environment.

⍰ Internship Perks

- Internship Offer Letter
- Completion Certificate
- Unique ID Certificate
- Letter of Recommendation (based on performance)
- Job Opportunities / Placement Support
- Resume Building Support

⍰ Instructions for Interns

1. Share your internship status on **LinkedIn**, tagging **@ApexcifyTechnologys**.
2. Complete the **assigned projects** within the mentioned time frame.
3. Upload your complete source code to **GitHub** in a repository named:
   `ApexcifyTechnologys_ProjectName`
4. Post a **video explanation** of your project on LinkedIn with GitHub repo link.
5. Submit your completed task using the **Submission Form**.
6. **Complete any 3 or 2 out of the 4 tasks** listed below (from your domain).

⍰ App Development Task List

(Complete any 2 or 3 of the following tasks)

✅TASK 1: Build ApexcifyTechnologys Profile Page

- Create a profile page layout that displays user image, name, email, and a short bio.
- Use widgets such as CircleAvatar, ListTile, and Container.
- Add a floating action button (FAB) to allow editing (no need to implement editing functionality).

ApexcifyTechnology

✅TASK 2: Random Quote Generator

Develop an app that:

- The app should **display a random quote** every time the user opens the app or clicks a button.
- Include a **"New Quote" button** that shows a different quote on each click.
- Each quote should display **text and author name** clearly.
- The app must have a **clean and minimal UI** for better user experience.

✅TASK 3: Fitness Tracker App

Create a fitness tracking app:

- The app should allow users to **track daily fitness activities** like steps, workouts, calories burned, etc.
- Users can **add or log their fitness data manually** (e.g., workout time, exercise type, calories).
- Include a **dashboard or summary screen** showing daily/weekly progress.
- UI should be **simple, clean, and user-friendly**, with visual elements like graphs or progress bars.
- Data can be stored using **local storage (like SQLite)** or integrated with a **backend like Firebase** for saving user records.

✅TASK 4: Personal Profile Card App

Goal: Build a simple app that shows your personal profile in a card format.

Features:

Display a **circular profile image**

Show **name**, **profession**, and **contact info**

Use **cards** or **containers** for layout

Apply basic styling (colors, fonts, padding)

Widgets to Use:

Scaffold, AppBar, Column, CircleAvatar

Text, Card, Icon, SizedBox

⍰ Important Note

Internship Completion Criteria:
To be eligible for the internship certificate, participants must complete a minimum of **two to three tasks**. Submitting only one task will be considered **incomplete**, and certificates will **not** be issued in such cases.

⍰ Submission Details

ApexcityTechnology

A submission form will be shared in your respective **WhatsApp group**. You are required to submit your completed task only through that form. Please follow the instructions mentioned in the form carefully to ensure your submission is accepted.
